#10 Mobile Street
Sauget, Illinois 62201

Dear Mr. Marcante:

Your request to obtain Uniform Hazardous Waste Manifests was received on December 19, 1986. If this request was to cover only shipments of waste water treatment sludge then the exemption explained below will pertain to your municipality.

Effective September 4, 1986, Governor Thompson signed SB 2117 (Section Attached). This bill eliminates the need for a Licensed Special Waste Hauler, and the Illinois Uniform Hazardous Waste Manifest when shipping "sludge from a water or sewage treatment plant owned and operated by a unit of local government".

There are three conditions your facility must meet to claim this exemption:

1. Your plant must have a sludge management plan approved by the Agency or a permit granted by the Agency.
2. Your waste must be tested and determined not to be a hazardous waste.
3. File a semi-annual report with the Agency listing the volume, hauler, and disposal site for the sludge. This report will be due every six-months on an Agency supplied form. These forms are being prepared and you should receive a supply approximately three months following this letter.

If you meet all of the above conditions, your waste may be shipped without the need of using a Licensed Special Waste Hauler or a manifest. If your trucks currently hold a SWH permit and haul the above described sludge, but no other Special Waste you will no longer need to obtain a SWH permit for your trucks. Note that the receiving facility must still have a permit issued by the Agency to accept your waste.
